DE METER

Desoutter

YOUR TOOLS ARE SPEAKING TO YOU,
ARE YOU LISTENING?

More Than Productivity

DEMETER ON THE WAY TO THE SMART FACTORY

WHAT IS DEMETER?

DeMeter is your ultimate solution for collecting, analyzing, and presenting assembly production data seamlessly, ensuring you stay ahead in the fast-paced world of manufacturing.

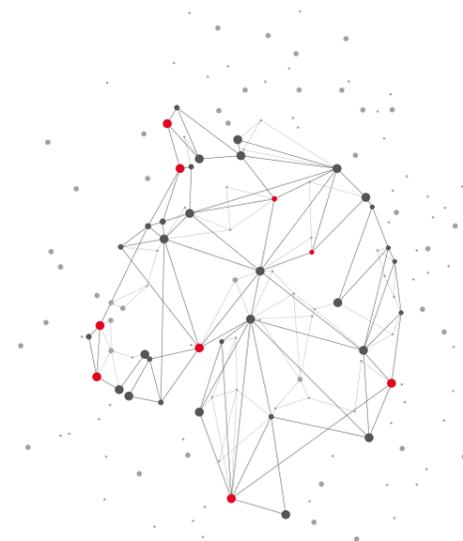

- Optimize your productivity in real-time
- Drive your quality efficiently

DeMeter is a data driven solution which provides **live data** and helps you with **prescriptions** to continuously improve your productivity and your quality.

These two points are the keys of success to digitalize your factory for a sustainable world and a profitable business.

WHY CHOOSING DEMETER ?

DESOUTTER 4.0

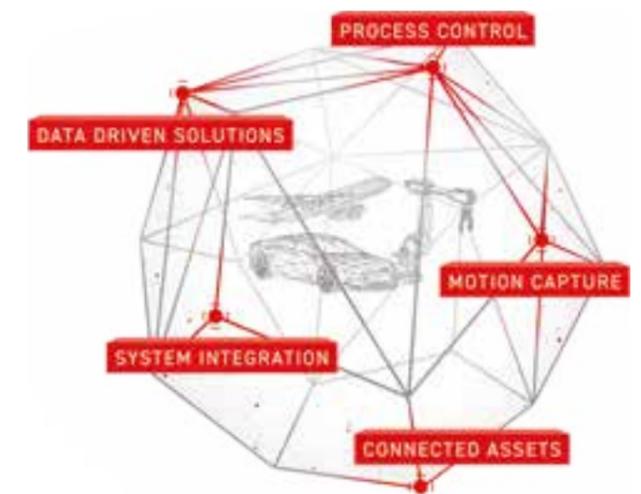

NOT ONLY A SOFTWARE COMPANY

Desoutter is a company leader for decades in assembly solutions, understanding completely the manufacturing challenges.

DeMeter is the result of our technical expertise and research on innovative solution based of the data generated from your tightening, drilling and process equipment in your factory.

THE DESOUTTER ECOSYSTEM

We can provide a wide range of solutions from applications to data analytics with recommendations thanks to a combination of human expertise and interconnected solutions.

DEMETER OPTIMIZE YOUR PRODUCTIVITY IN REAL-TIME

OEE MONITORING

Monitor the Overall Efficiency of your Equipment (OEE) of your factory with dedicated indicators.

Track every aspect of **your production in real-time**, empowering you to make informed decisions on the spot.

REAL-TIME DIAGNOSIS

Thanks to smart widgets, **detect immediately the bottlenecks** of your production with the identification of the most critical assets and/or stop reasons.

No need to wait to compile all your data by an expert, we do it live for you !

PRODUCTION STATUS & ALERTS

Stay connected to your production floor anytime, anywhere.

Monitor the Andon Board and receive instant notifications, ensuring you're always in the loop, even when you're on the move.

CUSTOMIZABLE METRICS

Tailor DeMeter to fit your unique needs with our intuitive live dashboard.

Choose and customize the indicators that are most to your business, ensuring you focus on what's essential for **your success**.

FUTURE PROOF SOLUTION

Specially designed for **high performance**, DeMeter architecture can handle huge amount of data and allow high reactivity of the decision makers to save time and costs in your daily life.

DEMETER DRIVE YOUR QUALITY EFFICIENTLY

TRACEABILITY

Collect and compile **all traceability** from your process control stations, drilling and tightening tools.

REAL-TIME CHECK & REWORK

Set up an efficient rework strategy to **detect and rework live** all deviations detected for all parts in your production without stopping the line!

ANOMALY DETECTION SYSTEM

Thanks to its advanced **Curves Analytics** feature, DeMeter is able to identify deviations or abnormalities of curves to guarantee the best quality of your product and prevent from field recalls.

BOOSTLAB REPORTS

BoostLab - an in-depth reporting solution - analyses production trends and provides recommendations and **prescriptions** to boost productivity and drive cost down over time.

SERVICE SUPPORT

Always connected to our Remote Experts Team through your Support Portal!

Benefit from our expertise instantly and stay up to date with the latest innovations.
